

Welcome to Lost Light!

To install the game, locate the Lost Light.exe file. It should look like a blue cube. Clicking on that will bring up a menu to where you wish to extract the game. Extract the contents to a folder of your choice, and then open up that folder. Inside the folder, you will see a Game.exe file. Double-clicking that application will launch the game. It's that easy!

Things worth noting:

- This game was made in the RPG Maker engine and will not run on Macs unfortunately.
- Alt+enter will enter fullscreen but the performance tends to drop a little so proceed with caution, especially in areas with large amounts of light sources
